Commodore World is the all-new publication that will keep you informed in these times when up-to-date information on Commodore computing is so hard to find. Published by Creative Micro Designs, the industry leader in development of Commodore-related products for over six years, Commodore World will supply you with information on what's new, what's still available, and above all else—*where* to get it. If you felt you had nowhere to turn to for Commodore support, turn to the pages of Commodore World for a wealth of resources ready to help you get the most from your computer!

You'll find Commodore World feature articles informative and easy to read; what's more, they're written by leading authorities and experts, many of whom have written for other Commodore-related publications in the past. And Commodore World has something for everyone, whether you're a novice or an experienced programmer.

And while our feature articles help to cover different subjects in each issue, regular columns provide on-going insight into topics of interest to most users. You'll find columns that cover BASIC and advanced programming, and even a column for GEOS programming. And if you prefer being a GEOS user to being a GEOS programmer, you'll find another column devoted to helping you get more out of GEOS. If you want to learn more about using and programming the various peripherals on your system—you guessed it, we've got a column for that as well. Even first-time Commodore users will find a column devoted specifically to their needs.

And there's even more. Departments that cover news, telecommunications, reviews of available hardware and software; even news of what's happening in other Commodore-related publications!

So, if you really want to get the most from your Commodore, there's no better way to get it than Commodore World!

Columns

Just For Starters - An introduction to the C64/128 by Steve VanderArk
Foreign Exchange - An inside look at the market in Europe by Joseph Gaudl
Graphic Interpretation - GEOS, GEOS and more GEOS by Steve VanderArk
geoProgrammist - GEOS programming techniques by Maurice Randall
BASIC Instincts - BASIC tutorials and type-in programs by Gene Barker
Advanced Techniques - ML/BASIC programming that pushes the envelope
Peripheral Vision - Technical insights to C-64/128 hardware peripherals
Carrier Detect - Exploring every facet of the Telecommunications experience
Over The Edge - Editorial covering various computer related topics and news

In-depth Feature Articles

New Product Reviews

GEOS Coverage

BASIC/ML Programming

Telecommunications

WOW! It's beautiful! I just received my first issue of Commodore World...THANK YOU, THANK YOU, THANK YOU!

- John Marcelle, Manteca, CA

What a terrific effort! This promises to be a landmark publication for the Commodore computerist!

- Edward Rohan, Anaheim, CA

Foreign Market Coverage

Timely Editorials

Hardware Projects

Lots of Advertisers

...and much more

It is a very professional looking publication, though I would have expected no less from CMD. CW is a must-have...Nice Work!

- Ed Bell, CBM Conference, Fidonet

I got mine today and leafed through it and was VERY, VERY impressed.

- I. McKinney, Commodore RT, GENie
